FARMAZINK NON-STERILE

PRE-ROLLED ZINC TREATED BANDAGES

Sustaining bandage for leg ulcers, varicose veins, thrombosis and post-operative treatment of fractures, strains, sprains and operations on bones and/or limbs.

Available in **elastic** or **non-elastic types** in various sizes.

The elastic type allows greater compression.

ELASTIC TYPE - Composition: 31% Polyamide - 69% Viscose

Code	Size	Packaging
930244874	10 cm. x 5 mt.	1 pc.
930244898	10 cm. x 10 mt.	1 pc.

NON ELASTIC TYPE - Composition: 100% Viscose

Code	Size	Packaging
930244900	10 cm. x 5 mt.	1 pc.
930244912	10 cm. x 10 mt.	1 pc.

FARMATAPING FUNCTIONAL BANDAGE NON-STERILE

Non-elastic adhesive bandage for functional bandaging (Taping). Made of a high resistance cotton textile support and special hypo-allergenic synthetic adhesive with a high percentage of zinc oxide (greater than 20% dry based) for an efficient anti-swelling effect. While it offers high traction resistance, it is easy to tear with fingers which allows the user quick and easy dexterity. Besides the use for functional bandaging, it is successfully used for generic orthopedic immobilization as well as to hold Kramer or other types of splints.

Code	N° Rolls	Size
984370458	1	H. 3,8 cm. / L. 10 mt.
984370433	1	H. 5 cm. / L. 10 mt.

Composition: 100% Cotton with adhesive side of zinc oxide.

BANDAGE WITH ZINC OXIDE AND COOLING EFFECT

Semi-rigid elastic bandage. Easy to apply, does not contain alcohol, used especially in the event of sports injuries. Gives rapid relief. **Elasticity extension capacity: 60%.**

Non-sterile, disposable. To protect clothes, it is recommended to wrap another bandage or elastic tubular (Farmagrip type) over the Bandage.

Code	Size	Packaging
925337471	H. 6 cm. x L. 5 mt.	1 pc.
925337444	H. 8 cm. x L. 5 mt.	1 pc.
925337469	H. 10 cm. x L. 5 mt.	1 pc.

Composition: Bandage support: 69% Viscose, 31% Polyamide - Cooling gel: dispersion of zinc oxide on a matrix of hydrocolloid alginate and cellulose esters.

NON-STERILE

REMOVER SPRAY

FOR MEDICAL ADHESIVES

Permits easy, quick and painless removal of medical adhesives.

Particularly indicated to remove: Ileostomy bags • Colostomy bags • Urostomy bags • Medicated and medication plasters, tape bandages, etc.

No alcohol, does not burn. No oils, does not leave any oily residues, which allows easy application of new adhesive.

Code	The innovative internal valve BOV (BAG ON VALVE) on the canister guarantees:
923555116	<ul style="list-style-type: none"> • Optimum distribution of the spray. • Product can be sprayed from any angle (360° of action) which allows the user to reach any area of the body. • The entire contents of the canister (50 ml) will be used without any residues or waste.

SKINPROTECTOR

MD CE NON-STERILE

PRETAPE - SKINSAVER

Made of polyurethane foam. Absorbs humidity when applied under casts or under synthetic insulating material for rigid bandages. The Skin protector pre-tape is a thin, resistant film that permits stable and safe applications.

Yellow color. Non-sterile.

Indicated use:

Sports Medicine, phlebology and orthopedics • To protect the skin from adhesive and function taping bandages • Allows easy removal of the taping bandage without pain • To hold insulating materials in place.

Composition: 100% Polyurethane foam.

Code	Roll Size	Packaging
923507659	27 mt. x 7 cm.	2 pcs.
983539723	27 mt. x 7 cm.	1 pc.

KINESIOTAPING FARMACARE®

MD CE NON-STERILE

Adhesive Bandage for kinesiology for the treatment of pain using the most current physiotherapy technology. Studied to treat specific skin layers and muscle tissues. It acts locally to treat muscle pain and inflammation.

Water Resistant • Long Lasting • Latex Free • Biocompatible • Adhesive • Disposable.
Non-sterile and cannot be sterilized.

Composition: Textile Tape: 97% cotton – 3% Spandex. / Adhesive: Ethyl Acetate 55-65% - Acrylic Polymer 35-45% / Adhesive: Hypoallergenic and Biocompatible.

Available in different colors • Size: 5 cm x 5 mt.

904348570	G - 12 cm.	large thigh

SILICONE LATEX FREE PESSARY

STERILE

Made of biocompatible platinum cured Medical Grade SILICONE.

Transparent color • Latex and phthalates free.

When prescribed and positioned by competent medical personnel, this device is indicated to contain uterine prolapse. The characteristics of the special quality of silicone used make the device: biocompatible, water repellent and hypo-allergenic, guaranteeing the "long term" use in situ (more than 30 days). To ensure a practical and safe positioning, the device is supplied STERILE.

ULTRASOUND GEL

NON-STERILE

Conductive Gel for ultrasound devices.

Easily spread uniformly and is an efficient means to join the transducer to the skin.

For external use. Hydrosoluble, hypoallergenic.

Non greasy, does not irritate the skin, does not contain abrasive substances and does not damage transducers.

Single Use • Latex free.

Code	ml.	Code	ml.
930244847	250	926830643	1000

ELECTRO-CONDUCTIVE GEL MD CE NON-STERILE

Recommended for all medical diagnostic applications where a reduced contact resistance between electrodes and the patient's skin is necessary during bio-electric signal testing (ECG, EEG, EMG, PE) or for therapeutic treatments (TENS, etc.). Water based gel, enriched with electrolytes, hydrosoluble and hypoallergenic, totally without perfumes or essences. The gel does not damage the test electrodes, as it contains no abrasive substances. It does not stain or leave oily marks. **Colourless and odourless • For external use • Disposable.**

909071413	Stethophonendoscope

Spare parts:

- Cod. **901069385** - Y-tube for standard stethoscope - color: black
- Cod. **900726530** - Standard stethoscope single head
- Cod. **900214141** - Eartips for stethoscope - 6 pcs.

FINGER PULSE OXYMETER

0123

Classe IP22: Dustproof and waterproof class

WITH LOW PERFUSION MEASUREMENT

Non-invasive device for measurement of blood oxygen saturation in hemoglobin, and cardiac frequency.

OLED color Display with simultaneous viewing of values and plethysmogram PHY Low perfusion functioning: 0,2%.

The DSP advanced algorithm can improve accuracy of the low perfusion measurement. Visual and Acoustic alarm function.

Light and easy to use; Automatic turn off.

2 standard alkaline batteries AAA , 1,5 V included (duration: more than 20 hours of consecutive operation).

Code

980079558

FARMACARE CLINICAL THERMOMETER

0197

MERCURY-FREE / ENCLOSED-SCALE

Used to measure human body temperature. Glass liquid expansion thermometer for medical use, for detecting body temperature by oral, rectal or armpit method.

The ecological thermometer contains an alloy of gallium, indium and tin named Galinstan. Galinstan is not poisonous and is eco-friendly.

TECHNICAL DATA:

Measuring range: 35.5 °C - 42 °C

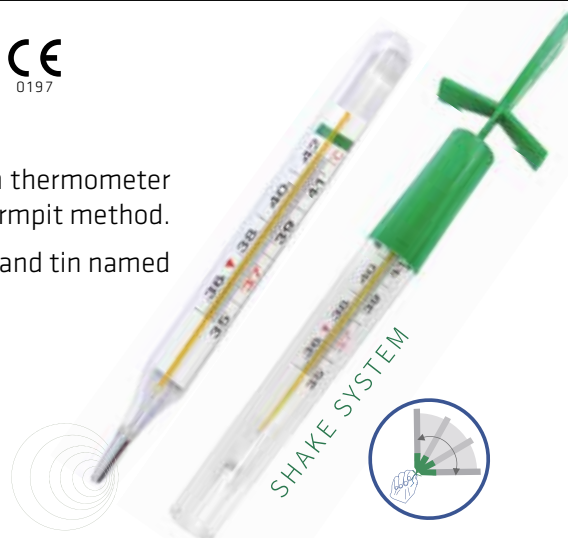

Resolution: 0.1 °C

Accuracy: +0.1 °C / -0.15 °C

Storage temperature: from -10 °C to 42 °C

Code

986958344

INFRARED THERMOMETER

0123

NO-CONTACT

The device uses infrared technology to measure temperatures at a distance, such as the forehead/on the body of neonates and adults. The thermometer is indicated both for home use and for professionals.

- Temperature measurement in conditions of maximum hygiene, without skin contact;
- The Device is also capable of measuring: temperature values below 32 °C and above 42,9 °C
- Temperature measurement of surfaces: 0 °C / 60 °C / of the environment: 0 °C / 40 °C
- Measuring distance: 3-5 cm. Wait for 3 to 5 seconds before the next measurement;
- 3 measurement modes: BODY - SURFACE TEMP - ROOM
- Automatic shut off after 30 seconds when not in use;
- Battery function (included)

Code

980530859

DIGITAL THERMOMETER

0197

FROM DISTANCE

The device allows temperature measurement from a distance: body, objects/liquids and environment.

- Fast measurement: in 3 seconds the device is capable to measure temperature
- Measurement under maximum conditions of hygiene without contact with the skin and/or external surfaces
- Precise measurement: Extended range 0°C - 100°C - Accuracy ± 0.2°C
- Adjustable regulation: °C - °F
- Measurement distance: 1-5 cm
- Visual and acoustic alarms: color indicator to signal the presence of fever, acoustic alarm to indicate the completed.

FARMACUP MENSTRUAL

FarmaCup is a safe, ecological and practical alternative to traditional internally used absorbent tampons.

It respects both your body and the environment because it is hypoallergenic and reusable. It is very economic when compared to traditional tampons and respects the environment.

FarmaCup is easy to use on any occasion, both during the day or at night, while travelling or when involved in sports activities. It is manufactured in soft, 100% platinum cured medical silicone. Instead of absorbing the menstrual flow, it collects it, respecting the natural equilibrium of your body.

Does not contain latex, phthalates or substances of animal origin (BSE-TSE), nor colorings, perfumes or dangerous chemical substances. Conforms to standards: FDA - USP CLASS VI ISO 10993 - ROHS - REACH

923507673	FarmaCup SMALL size
923507685	FarmaCup LARGE size
923507636	Bag replacement

Two sizes for every type of woman:

I have not had children	Small	Large
I have had children with natural birth	Large	Large
I have had children by Cesarean section	Small	Large

FARMACUP KIT

FarmaCup Kit includes everything necessary to get the best use out of your menstrual cup. The practical and discreet kit bag contains everything necessary to insert, empty, store, transport and hygienize your menstrual cup while travelling, when away from home for any reason (work, sports, free time, etc.) and also when at home.

Using the FarmaCup is today even easier thanks to the convenient travel Kit which is complete with everything needed to best manage your menstrual cup (at home or away from home) with the maximum safety and hygiene. Choose your size and feel free in any situation.

ORAL CLEANING STICKS

NON-STERILE

SINGLE PACKAGED

This medical device is intended for cleaning of the oral cavity for patients with movement disabilities (for example following a stroke or when subjected to intubation). The product is for use by professionals and for temporary use. Using this device it is possible to wet the oral cavity during the course of cleaning. Each device is a stick which permits a firm grasp and has a small sponge that has **two smooth sides** for delicate cleaning and **three textured sides** for more thorough cleaning and an efficient removal of residues. Single use disposable.

Packaging in single envelopes guarantees maximum hygiene and allows protection of the device until the moment it is in use.

- Length of stick: about 13 cms.
- Stick made of PP
- Sponge dimensions: width 1.5 cms – height 2.5 cms – depth 1 cm
- Sponge made of PP, density about 25 Kg/m³
- Sponge absorbency capacity about 100 gr/100 cm³
- Sponge traction resistance capacity about 15N (Newton)
- Sponge extension capacity about 10N/cm
- Green color.

Code	Description

WATERPROOF INCONTINENCE BRIEF

The Farmacare waterproof briefs includes two unisex models to satisfy the needs of patients with medium to heavy urine incontinence. These briefs have been designed to guarantee maximum comfort to the user, through the wide selection of sizes available. The materials and models were selected for maximum efficiency to retain absorbent pads of various dimensions and consistencies, and to ensure maximum discretion.

Particularly indicated for moderate urine incontinence and fully active persons for practical use outside the home. The polyurethane base ensures that the zone directly under the absorbent pad is totally waterproof.

SOFT model

Composition of brief: 97% Cotton – 3% Lycra.

Composition of internal coating:

100% Cotton over a Polyurethane base.

BRIEF FOR INCONTINENCE

MODEL SERENA

The brief is intended for incontinent patients and should be used in combination with an absorbent diaper. The absorbent diaper must be placed inside the brief, in the appropriate inner pocket. The maximum fit of the brief allows use even under normal clothing. The brief should be placed so that the upper edge is at the patient's waist and should be fixed with the snaps. The snaps allow the opening of the front side of the diaper and its easy and fast replacement. The maximum fit of the brief allows use even under normal clothing.

Composition:

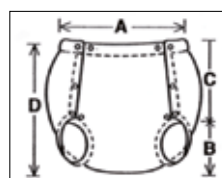

Pant: 55% polyester, 45% polyurethane

Inner pocket: 77% viscose bamboo fiber, 23% polyester

Variable Compression Class 1

Packaging: 1 pair

- **Insert with multi-directional elastic knit and seams on the external side.**
Prevents the tourniquet effect. Improves fit and comfort.
- **Pre-formed heel created during the knitting phase (not during ironing).**
Helps to avoid socks moving up or down.
- **Inspection hole at the toe tips.**
Allows rapid checking of the foot
- **Silicone on the upper edge band.**
Avoids the sock moving and permits good compression
- **Sock size knit directly on the sock foot: always remains perfectly readable.**
Makes size identification easy.

FARMAELASTIC KNEE SOCK (two-way elasticity)

Elastic knee high sock - Two-way elasticity with decreasing compression - Closed heel to avoid the risk of blister formation - Anatomical shape - Open toe for easy inspection. 2pcs in a package.

Indications: Post-phlebitis syndrome • Minor venous insufficiency • Minor swelling of various origins of the lower limbs (bruises, trauma, sprains) • Pre and post operative preparation of patients with risk of minor phlebitis • Inflammation associated with varicose veins • Compliment to sclerosing therapy • Other pathologies as indicated by doctors.

Composition: 74% Polyamide, 26% Elastane • Latex Free.

HEATING PADS PHYSIOPLUS LINE

Intended to radiate moderate heat to specific areas of the body to provide the user with maximum comfort.

RECTANGULAR HEATING PAD

MULTI-PHYSIOPLUS

Thanks to its multipurpose shape allows use on different parts of the body, giving warmth and well-being to the user. The micro-spheres that make up the outer cover in a honeycomb 3D fabric guarantee high breathability.

Code

983539762

Dimensions: L 40 x H 35 cm
Weight: 0.38 Kg
Cable length: 2.1 mt

The perceived heat depends on numerous variables such as the temperature of the environment of use, clothing and the subjective sensitivity of the user.

CERVICAL HEATING PAD

PHYSIOPLUS

The cervical heating pad thanks to its fit allows use in the cervical area and shoulders giving warmth, relaxation and well-being to the user. The micro-spheres that make up the outer cover in a honeycomb 3D fabric guarantee high breathability.

Code

983539750

Dimensions: L 47 x H 52 cm
Weight: Almost 1 Kg
Cable length: 2.1 mt

TICK REMOVER LINE

The probability of transmission of pathogenic agents by tick bites depends closely on the length of time that the tick remains on its host and in general the risk is low if the tick has been attached for less than 24-48 hours. That is why it is important to remove the tick as fast as possible.

TWISTING TICK REMOVER

TWIRL SYSTEM

The Rotation Hook Tick Remover (Twirl System) is a set of products specifically designed to remove tick parasites from animals and humans.

Allows removal of the tick quickly, easily and without pain; Does not squeeze the tick abdomen, thereby lowering the risk of pathogen transmission; If used correctly, will not leave tick mouthpart residues in the skin.

2 pieces Set - includes medium and large size.

Code	Description
